Parte 2: Creación de un Dominio (DNS) público gratuito (por tres meses) en <https://www.freenom.com/es/index.html>

1. Ingrese al sitio <https://www.freenom.com/es/index.html> y realice el proceso de registro.

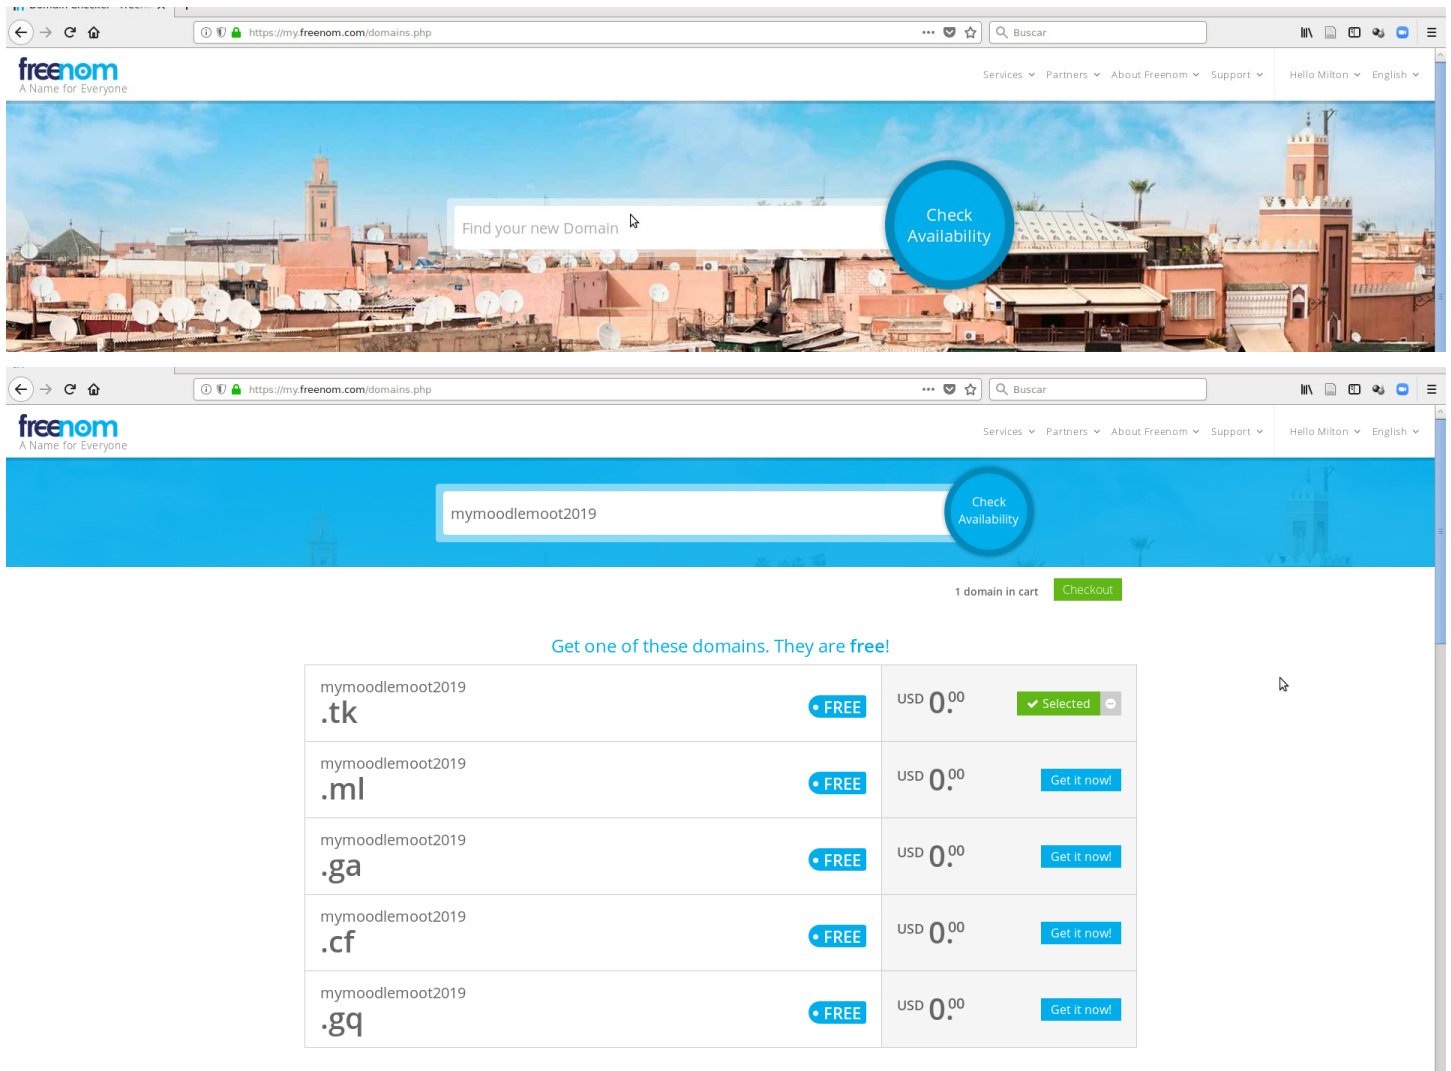

Si tiene una cuenta de Google puede usarla, con lo cual el registro es mucho más rápido y sencillo.

2. Después de registrarse e iniciar sesión, seleccione la opción de Registrar un nuevo dominio.

3. Busque el dominio que desea crear y selecciónelo. Si no está disponible pruebe con otros nombres.

4. Seleccione la opción de usar DNS y escriba la dirección IP pública que Amazon AWS asignó a la máquina.

The screenshot shows the Freenom website's domain registration interface. At the top, there's a search bar with the text "Find a new FREE domain" and a "Check Availability" button. Below this, a form displays the domain "mymoodlemoot2019.tk" with a red status indicator. Two options are available: "Forward this domain" and "Use DNS". The "Use DNS" option is selected, highlighted with a green box. To the right, the "Period" is set to "3 Months @ FREE". A blue "Continue" button is at the bottom right.

This screenshot shows the "Use your own DNS" configuration step. It features a section titled "Enter your A record here" with two input fields. The first field has "Hostname" as "mymoodlemoot2015" and "IP address" as "13.59.140.170". The second field has "Hostname" as "www.mymoodlemoot" and "IP address" as "13.59.140.170". The "Continue" button remains at the bottom right.

The screenshot displays the "Managing mymoodlemoot2019.tk" page. The header includes the Freenom logo and navigation links: "Information", "Upgrade", "Management Tools", and "Manage Freenom DNS". The "Management Tools" dropdown menu is open, showing options: "Nameservers", "Register glue records" (highlighted with a mouse cursor), "URL Forwarding", "Dot TK Apps", "Dot TK Ambassadors", and "Cancel domain". On the left, under the "Information" tab, there's a "« Back to Domains List" button. On the right, a table shows the domain status as "ACTIVE".

Domain	Status
mymoodlemoot2019.tk	ACTIVE

Register glue records

Domain Name: **mymoodlemoot2019.tk**

From here you can create and manage custom nameservers for your domain (eg. NS1.yourdomain.com, NS2.yourdomain.com...).

hostname	IP Address	
ns1	.MYMOODLEMOOT2019.TK	13.59.140.170
		+
« Back		

Register glue records

Domain Name: **mymoodlemoot2019.tk**

The nameserver was successfully registered

From here you can create and manage custom nameservers for your domain (eg. NS1.yourdomain.com, NS2.yourdomain.com...).

hostname	IP Address	
NS1.MYMOODLEMOOT2019.TK	13.59.140.170	✕ ✓
	.MYMOODLEMOOT2019.TK	+
« Back		

5. Complete el proceso de registro. Se generará un número de orden y un correo electrónico. Espere un par de minutos y avance a la Parte 3 del Taller.

Review & Checkout

Description	Price
Domain Registration - mymoodlemoot2019.tk	\$0.00USD
Subtotal:	\$0.00USD
Total Due Today:	\$0.00USD

Felicitaciones, has creado un dominio público gratuito personalizado, el cual estará vigente por tres (3) meses. Tu dominio ahora está enlazado con la máquina creada en AWS en la Parte 1. Avanza a la Parte 3 para te conectes a la máquina de la nube y despliegues allí Moodle usando dockers.
